

Compressed Gases Safety Awareness for Local Authority Inspectors

If you can't identify the hazards you can't assess the risks

This half-day Instructor-led workshop has been designed specifically for Local Authority Inspectors (LAI's) who regularly visit establishments where compressed gases are used, handled and stored

Benefits

- Training delivered by highly skilled, industry trained, experienced course directors
- Efficiently ensure that staff gain awareness of cylinder and cryogenic gas safety
- Cost-effective on-site training

Who should attend?

- Local Authority Inspectors
 - Environmental Health Officers
- This workshop provides essential gas cylinder information to enable LAI's to review workplace compliance in line with legislation and best operating practice

"the training and supporting documentation were excellent, one of the most informative and best presented safety course the commercial enforcement team has attended"

Bob Cole, Health & Safety Advisor
Winchester City Council

"The trainer was excellent – I didn't know I knew so little about gas. I have since passed details of your company onto several colleagues... Thanks again"

Nick Harvey, Safety and Hygiene Officer
Havant Borough Council

- Why do accidents occur?
- What's in the air?
- Properties of gases - specific gravities
- Inert gases, hazards of oxygen deficiency
- Use of balloon gas in the retail sector
- Oxy-acetylene usage
- Hazards of oxygen enrichment
- Hazards posed by oils and greases
- Hazards of flammability
- Personal Protective Equipment
- Safe selection & operation of gas cylinders
- Hazards posed by pressure
- Gas control equipment
- The need to check and maintain regulators
- Safe handling of gas cylinders
- Safe storage of gas cylinders
- What happens when it all goes wrong

The workshop will enable participants to:

- Correctly identify gas cylinders
- Recognise the hazards associated with inert gases and oxygen deficiency
- Appreciate the hazards posed by oxygen enrichment
- Identify flammability hazards
- Appreciate the need for the correct gas control equipment
- Be aware of the maintenance requirements for gas control equipment
- Recognise the hazards associated with handling gas cylinders
- Assess current storage facilities in line with safe working practices
- Become pro-active in assessing risk when visiting organisations who use gas cylinders

Workshop price

Compressed Gases Safety Awareness for LAI's (3½ hours)
£980 for up to 8 delegates, additional delegates £95 per head up to a maximum of 20 delegates. VAT is payable at the standard rate.

Gas Safe^{LTD}

Additional Information

If you can't identify the hazards you can't assess the risks

Next step...do your delegates require practical training?

If delegates would like hands-on experience this can be arranged

- Connecting Regulators & Cylinder Set-up
- Oxy-fuel Gas Systems Set-up and Pre-use Check

All delegates must attend the safety awareness workshop before they can participate in the practical, which is usually held in the afternoon of the same day

Providing total training solutions for gas users...

- All your delegates will receive a certificate of attendance and comprehensive workshop literature for continued reference purposes in the workplace. This includes relevant Standard Operating Procedures if a practical workshop has been attended.

e-Learning

Packages are available for those clients who need a more flexible, accessible method of training which delivers high quality affordable training without the need to gather employees together in a classroom. This method of training is ideal for single users, new starters or as refresher training.
